NATIONAL INSTITUTE FOR HEALTH SPECIALTIES

NIHS Program Requirements for Specialty Education in Anatomic Pathology and Clinical Pathology (Emirati Board in Anatomic Pathology and Clinical Pathology)

The Emirati Board in Anatomic Pathology and Clinical Pathology is expected to define its specific program aims consistent with the overall mission of its Sponsoring Institution, the needs of the community it serves and that its graduates will serve, and the distinctive capabilities of physicians it intends to graduate. The Program must demonstrate substantial compliance with the Common and specialty-specific Program Requirements.

Where applicable, text in italics describes the underlying philosophy of the requirements in that section. These philosophic statements are not program requirements and are therefore not citable.

Issue Date: 17/09/2025

Introduction

Int. A. Preamble

Graduate medical education is an important step of professional development between medical school and independent clinical practice. It is in this vital phase of the continuum of medical education that residents learn to provide best patient care under the supervision of faculty members who not only instruct, but also serve as role models of excellence, compassion, professionalism, and scholarship.

Graduate medical education transforms medical graduates into physician scholars who care for the patient, family, and a diverse community; create and integrate new knowledge into practice; and educate future generations of physicians to serve the public.

Graduate medical education has as a core tenet the graded authority and responsibility for patient care. The care of patients is undertaken with appropriate faculty supervision and conditional independence, allowing residents to attain the knowledge, skills, attitudes, and empathy required for independent practice. Graduate medical education develops physicians who focus on excellence in delivery of safe, equitable, affordable, quality care; and the health of the populations they serve.

Graduate medical education occurs in clinical settings that establish the foundation for practice-based and lifelong learning. The professional development of the physician, begun in medical school, continues through faculty modeling of the effacement of self-interest in a humanistic environment that emphasizes joy in curiosity, problem-solving, academic rigor, and discovery. This transformation is often physically, emotionally, and intellectually demanding and occurs in a variety of clinical learning environments committed to graduate medical education and the well-being of patients, other residents and fellows, faculty members and all members of the health care team.

Int. B. Definition of Specialty

Pathology is a medical specialty that focuses on understanding the causes and nature of diseases by examining tissues, cells, and body fluids. Pathologists play a crucial role in diagnosing diseases, monitoring disease progression and treatment efficacy, determining disease risk, and establishing causes of death. They oversee clinical laboratories, ensuring accurate analyses, and often develop new testing methods. Additionally, pathologists serve as expert consultants to other physicians, integral to the patient care decision-making process.

The residency programs shall offer training in the following main divisions:

1. *Anatomic Pathology (AP)*: This branch primarily involves the evaluation of structural changes in tissues and organs. It encompasses areas such as surgical

pathology, cytopathology, and forensic pathology. Residents in AP gain experience in gross dissection, histologic evaluation, and autopsy procedures.

2. *Clinical Pathology (CP)*: This branch focuses on laboratory analysis of bodily fluids and tissues to diagnose diseases. It includes subspecialties like clinical chemistry, immunology, medical microbiology and serology, hematology, transfusion service and molecular pathology. Clinical pathologists work closely with medical technologists and other healthcare professionals to ensure accurate laboratory results that improve patient care.

Int. C. Length of educational program

The educational program in Anatomic and Clinical Pathology (APCP) must be 60 months in length. ^(Core)

I. Oversight

I.A. Sponsoring Institution

The Sponsoring Institution is the entity that assumes the ultimate financial and academic responsibility for a program of graduate medical education, consistent with the NIHS Institutional Requirements.

The Sponsoring Institution must be the primary clinical defined as the most utilized rotation site of clinical activity for the program.

Background and Intent: *Participating sites will reflect the health care needs of the community and the educational needs of the residents. A wide variety of organizations may provide a robust educational experience and, thus, Sponsoring Institutions and participating sites may encompass inpatient and outpatient settings.*

I.A.1. The program must be sponsored by one NIHS-accredited Sponsoring Institution. ^(Core)

I.B. Participating Sites

A participating site is an entity that provides educational experiences or educational assignments/rotations for residents.

I.B.1. The program, with approval of its Sponsoring Institution, must designate a primary clinical site. ^(Core)

I.B.1.a) The Sponsoring Institution should also sponsor NIHS accredited residency programs in Surgery as a mandatory specialty, along with at least two additional programs selected from the following: diagnostic radiology, family medicine, internal medicine, obstetrics and gynecology, and pediatrics. ^(Core)

I.B.2. There must be a program letter of agreement (PLA) between the program and each participating site that governs the relationship between the program and the participating site providing a required assignment. ^(Core)

I.B.2.a) The PLA must:

I.B.2.a)(1) be renewed at least every 5 years; ^(Core)

I.B.2.a)(2) be approved by the designated institutional official (DIO); ^(Core)

I.B.2.a)(3) specify the duration and content of the educational experience; ^(Core)

I.B.2.a)(4) state the policies and procedures that will govern resident education during the assignment; ^(Core)

I.B.2.a)(5) identify the faculty members who will assume educational and supervisory responsibility for residents; ^(Core)

I.B.2.a)(6) specify the responsibilities for teaching, supervision, and formal evaluation of residents. ^(Core)

I.B.3. The program must monitor the clinical learning and working environment at all participating sites. ^(Core)

I.B.3.a) At each participating site there must be one faculty member, designated by the program director as the site director, who is accountable for resident education at that site, in collaboration with the program director. ^(Core)

Background and Intent: *While all residency programs must be sponsored by a single NIHS-accredited Sponsoring Institution, many programs will utilize other clinical settings to provide required or elective training experiences. At times it is appropriate to utilize community sites that are not owned by or affiliated with the Sponsoring Institution. Some of these sites may be remote for geographic, transportation, or communication issues. When utilizing such sites, the program must ensure the quality of the educational experience.*

I.B.4. The program director must submit any additions or deletions of participating sites routinely providing an educational experience, required for all residents, of one-month full time equivalent (FTE) or more through NIHS Accreditation System. ^(Core)

I.B.5. Resident assignments away from the primary clinical site should not prevent residents' regular participation in rounds or conferences at the

primary clinical site, or in equivalent conferences at participating sites.
(Detail)

I.B.6. All participating sites responsible for training of residents must maintain relevant certification(s) including licensing certificates by Department of Health and/or accreditation(s) recognized at the local and/or National Health Authority level. (Core)

I.C. Recruitment

The program, in partnership with its Sponsoring Institution, must engage in practices that focus on mission-driven, ongoing, systematic recruitment and retention of a diverse and inclusive workforce of residents, fellows (if present), faculty members, senior administrative staff members, and other relevant members of its academic community. (Core)

I.D. Resources

I.D.1. The program, in partnership with its Sponsoring Institution, must ensure the availability of adequate resources for resident education. (Core)

I.D.1.a) At the primary clinical site, the program must provide each resident with:

I.D.1.a)(1) a designated work area; (Core)

I.D.1.a)(2) an individual computer with access to hospital and laboratory information systems, electronic health records, and the Internet; (Core)

I.D.1.a)(3) an individual light microscope and access to a multiheaded light microscope for rotations on which microscopic evaluations account for a major portion of the clinical experience; (Core)

I.D.1.a)(4) photo microscopy and gross imaging technology for residents; (Core)

I.D.1.a)(5) radiographic imaging technology, when applicable to specimen type; (Core)

I.D.1.a)(6) access to updated teaching materials, such as interesting case files and archived conference materials, or study sets, such as glass slides and virtual study sets, encompassing the core curriculum areas of anatomic and/or clinical pathology residency education, as matches the program's specialty concentration. (Core)

I.D.1.b) The program must have sufficient volume and variety of material available to ensure that residents have broad exposure to both common conditions and unusual entities. ^(Core)

I.D.1.b)(1) This material should be sufficient for anatomic pathology and/or clinical pathology, as matches the program's specialty concentration. ^(Detail)

I.D.1.c) The number and variety of tests performed in the program's laboratories should be sufficient to give residents experience in those tests typically available in a general hospital. ^(Core)

I.D.2. The program, in partnership with its Sponsoring Institution, must ensure healthy and safe learning and working environments that promote resident well-being and provide for ^(Core):

I.D.2.a) access to food while on duty; ^(Core)

I.D.2.b) safe, quiet, clean, and private sleep/rest facilities available and accessible for residents with proximity appropriate for safe patient care; ^(Core)

Background and Intent: *Care of patients within a hospital or health system occurs continually throughout the day and night. Such care requires residents' function at their peak abilities, which requires the work environment to provide them with the ability to meet their basic needs within proximity of their clinical responsibilities.*

Access to food and rest are examples of these basic needs, which must be met while residents are working. Residents should have access to refrigeration where food may be stored. Food should be available when residents are required to be in the hospital overnight. Rest facilities are necessary, even when overnight calls are not required, to accommodate the fatigued resident.

I.D.2.c) clean and private facilities for lactation that have refrigeration capabilities, with proximity appropriate for safe patient care; ^(Core)

Background and Intent: *Sites must provide private and clean locations where residents may lactate and store the milk within a refrigerator. These locations should be in close proximity to clinical responsibilities. It would be helpful to have additional support within these locations that may assist the resident with the continued care of patients, such as a computer and a phone. While space is important, the time required for lactation is also critical for the well-being of the resident and the resident's family.*

I.D.2.d) security and safety measures appropriate to the participating site; ^(Core)

I.D.2.e) accommodations for residents with disabilities consistent with the Sponsoring Institution's policy. ^(Core)

I.D.3. Residents must have ready access to Anatomic Pathology and Clinical Pathology-specific and other appropriate reference material in print or electronic format. This must include access to electronic medical literature databases with full text capabilities. ^(Core)

I.D.4. The program's educational and clinical resources must be adequate to support the number of residents appointed to the program. ^(Core)

I.E. Other Learners and Other Care Providers

The presence of other learners and other care providers, including, but not limited to, residents from other programs, subspecialty fellows, and advanced practice providers, must enrich the appointed residents' education. ^(Core)

I.E.1. The program must report circumstances when the presence of other learners has interfered with the residents' education to the DIO and to the graduate medical education committee (GMEC). ^(Core)

Background and Intent: *The clinical learning environment has become increasingly complex and often includes care providers, students, and post-graduate residents and fellows from multiple disciplines. The presence of these practitioners and their learners enriches the learning environment. Programs have a responsibility to monitor the learning environment to ensure that residents' education is not compromised by the presence of other providers and learners.*

II. Personnel

II.A. Program Director

II.A.1. There must be one faculty member appointed as program director with authority and accountability for the overall program, including compliance with all applicable program requirements. ^(Core)

II.A.1.a) The Sponsoring Institution's GMEC must approve a change in program director. ^(Core)

II.A.1.b) Final approval of the program director resides with the Central Accreditation Committee. ^(Core)

Background and Intent: While the NIHS recognizes the value of input from numerous individuals in the management of a residency, a single individual must be designated as program director and responsible for the program. This individual will have dedicated time for the leadership of the residency, and it is this individual's responsibility to communicate with the residents, faculty members, DIO, GMEC, and the NIHS. The program director's nomination is reviewed and approved by the GMEC. Final approval of program directors resides with the Central Accreditation Committee.

II.A.1.c) The program must demonstrate retention of the program director for a length of time adequate to maintain continuity of leadership and program stability. ^(Core)

Background and Intent: The success of residency programs is generally enhanced by continuity in the program director position. The professional activities required of a program director are unique and complex and take time to master. All programs are encouraged to undertake succession planning to facilitate program stability when there is necessary turnover in the program director position.

II.A.2. At a minimum, the program director must be provided with the salary support required to devote 50 percent FTE of non-clinical time to the administration of the program. ^(Core)

Background and Intent: Fifty percent FTE is defined as two-and-a-half (2.5) days per week. "Administrative time" is defined as non-clinical time spent meeting the responsibilities of the program director.

II.A.3. Qualifications of the program director:

II.A.3.a) must include Anatomic Pathology and Clinical Pathology expertise and at least three years of documented educational and/or administrative experience, or qualifications acceptable to the Central Accreditation Committee; ^(Core)

Background and Intent: Leading a program requires knowledge and skills that are established during residency and subsequently further developed. The time period from completion of residency until assuming the role of program director allows the individual to cultivate leadership abilities while becoming professionally established. The three-year period is intended for the individual's professional maturation.

The broad allowance for educational and/or administrative experience recognizes that strong leaders arise through diverse pathways. These areas of expertise are important when identifying and appointing a program director. The choice of a program director should be informed by the mission of the program and the needs of the community.

In certain circumstances, the program and Sponsoring Institution may propose, and the Central Accreditation Committee may accept a candidate for program director who fulfills these goals but does not meet the three-year minimum.

Successful administration of a Anatomic Pathology and Clinical Pathology residency program requires administrative time. At least half of the required 0.5 FTE should include blocked time to complete administrative requirements of the residency. Time spent in clinics supervising residents, while important, should not be counted in the required 0.5 FTE of administrative time.

II.A.3.b) must be licensed as a consultant and have at least three years post residency documented experience in Anatomic Pathology and Clinical Pathology, or with a specialty qualification that are acceptable to the Central Accreditation Committee; ^(Core)

II.A.3.b)(1) The program director must have current certification in anatomic and clinical pathology, anatomic pathology, or clinical pathology. ^(Core)

II.A.3.b)(2) If the program director is not certified in both anatomic and clinical pathology, there must be an associate program director with certification in the complementary specialty area. ^(Core)

II.A.3.c) must include current medical licensure and appropriate medical staff appointment; ^(Core)

II.A.3.d) must include ongoing clinical activity; ^(Core)

Background and Intent: A program director is a role model for faculty members and residents. The program director must participate in clinical activity consistent with the specialty. This activity will allow the program director to role model the Core Competencies for the faculty members and residents.

II.A.4. Program Director Responsibilities

The program director must have responsibility, authority, and accountability for administration and operations; teaching and scholarly activity; resident recruitment and selection, evaluation, and promotion of residents, and disciplinary action; supervision of residents; and resident education in the context of patient care. ^(Core)

II.A.4.a) The program director must:

II.A.4.a)(1) be a role model of professionalism; ^(Core)

Background and Intent: *The program director, as the leader of the program, must serve as a role model to residents in addition to fulfilling the technical aspects of the role. As residents are expected to demonstrate compassion, integrity, and respect for others, they must be able to look to the program director as an exemplary. It is of utmost importance, therefore, that the program director model outstanding professionalism, high quality patient care, educational excellence, and a scholarly approach to work. The program director creates an environment where respectful discussion is welcome, with the goal of continued improvement of the educational experience.*

II.A.4.a)(2) design and conduct the program in a fashion consistent with the needs of the community, the mission(s) of the Sponsoring Institution, and the mission(s) of the program; ^(Core)

Background and Intent: *The mission of institutions participating in graduate medical education is to improve the health of the public. Each community has health needs that vary based upon location and demographics. Programs must understand the social determinants of health of the populations they serve and incorporate them in the design and implementation of the program curriculum, with the goal of addressing these needs and health disparities.*

II.A.4.a)(3) administer and maintain a learning environment conducive to educating the residents. in each of the Core Competency domains; ^(Core)

Background and Intent: *The program director may establish a leadership team to assist in the accomplishment of program goals. Residency programs can be highly complex. In a complex organization, the leader typically can delegate authority to others yet remains accountable. The leadership team may include physician and non-physician personnel with varying levels of education, training, and experience.*

II.A.4.a)(4) develop and oversee a process to evaluate candidates prior to approval as program faculty members for participation in the residency program education and at least annually thereafter; ^(Core)

II.A.4.a)(5) have the authority to approve and/or remove program faculty members for participation in the residency program education at all sites; ^(Core)

II.A.4.a)(6) have the authority to remove residents from supervising interactions and/or learning environments that do not meet the standards of the program; ^(Core)

Background and Intent: *The program director has the responsibility to ensure that all who educate residents effectively role model Core Competencies. Working with a resident is a privilege that is earned through effective teaching and professional role modeling. This privilege may be removed by the program director when the standards of the clinical learning environment are not met.*

There may be faculty in a department who are not part of the educational program, and the program director controls who is teaching the residents.

II.A.4.a)(7) submit accurate and complete information required and requested by the DIO, GMEC, and NIHS; (Core)

II.A.4.a)(8) provide applicants who are offered an interview with information related to the applicant's eligibility for the relevant specialty board examination(s); (Core)

II.A.4.a)(9) provide a learning and working environment in which residents could raise concerns and provide feedback in a confidential manner as appropriate, without fear of intimidation or retaliation; (Core)

II.A.4.a)(10) ensure the program's compliance with the Sponsoring Institution's policies and procedures related to grievances and due process; (Core)

II.A.4.a)(11) ensure the program's compliance with the Sponsoring Institution's policies and procedures for due process when action is taken to suspend or dismiss, not to promote, or not to renew the appointment of a resident; (Core)

Background and Intent: *A program does not operate independently of its Sponsoring Institution. It is expected that the program director will be aware of the Sponsoring Institution's policies and procedures and will ensure they are followed by the program's leadership, faculty members, support personnel, and residents.*

II.A.4.a)(12) ensure the program's compliance with the Sponsoring Institution's policies and procedures on employment and non-discrimination; (Core)

II.A.4.a)(13) document verification of program completion for all graduating residents; within 30 days; (Core)

II.A.4.a)(14) provide verification of an individual resident's completion upon the resident's request, within 30 days; (Core)

Background and Intent: *Primary verification of graduate medical education is important to credentialing of physicians for further training and practice. Such verification must be accurate and timely. Sponsoring Institution and program policies for record retention are important to facilitate timely documentation of residents who have previously completed the program. Residents who leave the program prior to completion also require timely documentation of their summative evaluation.*

II.A.4.a)(15) obtain review and approval of the Sponsoring Institution's DIO before submitting information, as required in the Institutional Requirements and outlined in the NIHS guidelines to the Common Program Requirements. ^(Core)

II.A.5. Associate Program Director (APD):

II.A.5.a) For programs with an approved resident complement of more than 15, the sponsoring institution must appoint an Associate Program director to support the PD by actively participating in administrative and educational activities ^(Core)

II.A.5.b) Sponsoring institution to provide APD with 0.3 FTE (or 12 hours per week) of protected time for education and program administration, ^(Core)

II.A.5.c) APD should assume the role for a duration suitable for ensuring program continuity and stability. ^(Core)

II.B. Faculty

Faculty members are a foundational element of graduate medical education – faculty members teach residents how to care for patients. Faculty members provide an important bridge allowing residents to grow and become practice-ready, ensuring that patients receive the highest quality of care. They are role models for future generations of physicians by demonstrating compassion, commitment to excellence in teaching and patient care, professionalism, and a dedication to lifelong learning. Faculty members experience the pride and joy of fostering the growth and development of future colleagues. The care they provide is enhanced by the opportunity to teach. By employing a scholarly approach to patient care, faculty members, through the graduate medical education system, improve the health of the individual and the population.

Faculty members ensure that patients receive the level of care expected from a specialist in the field. They recognize and respond to the needs of the patients, residents, community, and institutions. Faculty members provide appropriate levels of supervision to promote patient safety. Faculty members create an effective learning environment by acting in a professional manner and attending to the well-being of the residents and themselves.

Background and Intent: *"Faculty" refers to the entire teaching force responsible for educating residents. The term "faculty," including "core faculty," does not imply or require an academic appointment or salary support.*

II.B.1. At each participating site, there must be a sufficient number of faculty members with competence to instruct and supervise all residents at that location. ^(Core)

II.B.1.a) There must be a faculty member designated as Autopsy Service Director to manage the autopsy service at the designated site for autopsy service. ^(Core)

II.B.1.a)(1) The Autopsy Service Director provides and oversees resident training in the performance of an autopsy, including gathering of information prior to an autopsy, examination and evisceration of the body, interpretation of findings, composition of a report, and communication of findings to the treating physicians and at conferences. In partnership with the program director, the Autopsy Service Director is responsible for assessing and ensuring the competency of residents in the performance of autopsy. ^(Core)

II.B.1.b) The program should have at least four full-time consultants, each holding recognized qualifications in their specialties. These specialties must include anatomical Pathology, Hematopathology/Transfusion Medicine, Microbiology and Clinical Chemistry. A minimum of 5 years of independent practice as pathologists is required. ^(Core)

II.B.2. Faculty members must:

II.B.2.a) be role models of professionalism; ^(Core)

II.B.2.b) demonstrate commitment to the delivery of safe, quality, cost-effective, patient-centered care; ^(Core)

Background and Intent: *Patients have the right to expect quality, cost-effective care with patient safety at its core. The foundation for meeting this expectation is formed during residency and fellowship. Faculty members model these goals and continually strive for improvement in care and cost, embracing a commitment to the patient and the community they serve.*

II.B.2.c) demonstrate a strong interest in the education of residents; ^(Core)

II.B.2.d) devote sufficient time to the educational program to fulfill their supervisory and teaching responsibilities; ^(Core)

II.B.2.e) administer and maintain an educational environment conducive to educating residents; ^(Core)

II.B.2.f) regularly participate in organized clinical discussions, rounds, journal clubs, and conferences; ^(Core)

II.B.2.g) pursue faculty development designed to enhance their skills at least annually; ^(Core)

Background and Intent: Faculty development is intended to describe structured programming developed for the purpose of enhancing transference of knowledge, skill, and behavior from the educator to the learner. Faculty development may occur in a variety of configurations (lecture, workshop, etc.) using internal and/or external resources. Programming is typically needs-based (individual or group) and may be specific to the institution or the program. Faculty development programming is to be reported for the residency program faculty in the aggregate.

II.B.2.g)(1) as educators; ^(Core)

II.B.2.g)(2) in quality improvement and patient safety; ^(Core)

II.B.2.g)(3) in fostering their own and their residents' well-being; ^(Core)

II.B.2.g)(4) in patient care based on their practice-based learning and improvement efforts. ^(Core)

Background and Intent: Practice-based learning serves as the foundation for the practice of medicine. Through a systematic analysis of one's practice and review of the literature, one is able to make adjustments that improve patient outcomes and care. Thoughtful consideration to practice-based analysis improves quality of care, as well as patient safety. This allows faculty members to serve as role models for residents in practice-based learning.

II.B.3. Faculty Qualifications

II.B.3.a) Faculty members must have appropriate qualifications in their field and hold appropriate institutional appointments. ^(Core)

II.B.3.b) Physician faculty members must:

II.B.3.b)(1) have current license in Anatomic Pathology and Clinical Pathology or other specialties as required, or possess qualifications judged acceptable to the Central Accreditation Committee. ^(Core)

II.B.3.c) Any non-physician faculty members who participate in residency program education must be approved by the program director. ^(Core)

Background and Intent: *The provision of optimal and safe patient care requires a team approach. The education of residents by non-physician educators enables the resident to better manage patient care and provides valuable advancement of the residents' knowledge. Furthermore, other individuals contribute to the education of the resident in the basic science of the specialty or in research methodology. If the program director determines that the contribution of a non-physician individual is significant to the education of the residents, the program director may designate the individual as a program faculty member or a program core faculty member.*

II.B.4. Core Faculty

Core faculty members must have a significant role in the education and supervision of residents and must devote a significant portion of their entire effort to resident education and/or administration, and must, as a component of their activities, teach, evaluate, and provide formative feedback to residents. ^(Core)

Background and Intent: *Core faculty members are critical to the success of resident education. They support the program leadership in developing, implementing, and assessing curriculum and in assessing residents' progress toward achievement of competence in the specialty. Core faculty members should be selected for their broad knowledge of and involvement in the program, permitting them to effectively evaluate the program, including completion of the annual NIHS Faculty annual survey.*

II.B.4.a) Core faculty members must be designated by the program director. ^(Core)

II.B.4.b) Core faculty members must complete the annual NIHS Faculty Survey. ^(Core)

II.B.4.c) Core faculty-to-resident ratio must be 1:3 ^(Core)

II.C. Program Coordinator

II.C.1. There must be a program coordinator. ^(Core)

II.C.2. At a minimum, the program coordinator must be provided with adequate time for the administration of the program. ^(Core)

Background and Intent: Each program requires a lead administrative person, frequently referred to as a program coordinator, administrator, or as titled by the institution. This person will frequently manage the day-to-day operations of the program and serve as an important liaison with learners, faculty and other staff members, and the NIHS. Individuals serving in this role are recognized as program coordinators.

The program coordinator is a member of the leadership team and is critical to the success of the program. As such, the program coordinator must possess skills in leadership and personnel management. Program coordinators are expected to develop unique knowledge of the NIHS and Program Requirements, policies, and procedures. Program coordinators assist the program director in accreditation efforts, educational programming, and support of residents.

Programs, in partnership with their Sponsoring Institutions, should encourage the professional development of their program coordinators and avail them of opportunities for both professional and personal growth. Programs with fewer residents may not require a full-time coordinator; one coordinator may support more than one program.

II.D. Other Program Personnel

The program, in partnership with its Sponsoring Institution, must jointly ensure the availability of necessary personnel for the effective administration of the program. ^(Core)

II.D.1. There must be clerical, administrative, and qualified laboratory technical personnel to support the clinical, teaching, educational, and research activities of the program. ^(Core)

Background and Intent: Multiple personnel may be required to effectively administer a program. These may include staff members with clerical skills, project managers, education experts, and staff members to maintain electronic communication for the program. These personnel may support more than one program in more than one discipline.

III. Resident Appointments

III.A. Eligibility Requirements

III.A.1. An applicant must meet the following qualifications to be eligible for appointment to a NIHS-accredited program: ^(Core)

III.A.1.a) Refer to NIHS criteria included in the Training Bylaw.

III.A.2. All prerequisite post-graduate clinical education required for initial entry or transfer into NIHS-accredited residency programs must be completed in a NIHS-accredited residency program, or in residency programs approved by the NIHS. ^(Core)

III.A.2.a) Residency programs must receive verification of each resident's level of competency in the required clinical field using NIHS Milestones evaluations from the prior training program upon matriculation. ^(Core)

III.A.2.b) Prior to appointment in the program, residents must fulfill the NIHS eligibility criteria. ^(Core)

Background and Intent: *Programs with ACGME-I Foundational Accreditation or from institutions with ACGME-I accreditation do not qualify unless the program has also achieved ACGME-I Advanced Specialty Accreditation. To ensure entrants into NIHS-accredited programs from ACGME-I programs have attained the prerequisite milestones for this training, they must be from programs that have ACGME-I Advanced Specialty Accreditation.*

III.A.3. A physician who has completed a residency program that was not accredited by NIHS, may enter a NIHS-accredited residency program in the same specialty at the PGY-1 level and, at the discretion of the program director of the NIHS-accredited program and with approval by the GMEC, may be advanced to the PGY-2 level based on NIHS Milestones evaluations at the NIHS-accredited program. ^(Core)

III.B. Number of Residents

III.B.1. The program director must not appoint more residents than approved by the Central Accreditation Committee. ^(Core)

III.B.2. All changes in resident complement must be approved by the NIHS Central Accreditation Committee. ^(Core)

III.B.3. The number of fellows appointed to the program must not exceed the program's educational and clinical resources. ^(Core)

III.B.4. There should be at least two residents enrolled in each year of the program. ^(Detail)

III.C. Resident Transfers

The program must obtain verification of previous educational experiences and a summative competency-based performance evaluation prior to acceptance of a transferring resident, and Milestones evaluations upon matriculation. ^(Core)

IV. Educational Program

The NIHS accreditation system is designed to encourage excellence and innovation in graduate medical education regardless of the organizational affiliation, size, or location of the program.

The educational program must support the development of knowledgeable, skillful physicians who provide compassionate care.

IV.A. Curriculum Components

The Educational Curriculum must contain the following educational components: ^(Core)

IV.A.1. A set of program aims consistent with the Sponsoring Institution's mission, the needs of the community it serves, and the desired distinctive capabilities of its graduates; ^(Core)

IV.A.2. Competency-based goals and objectives for each educational experience designed to promote progress on a trajectory to autonomous practice which is documented by Milestones evaluation. ^(Core)

IV.A.3. These goals and objectives must be distributed and available to residents and faculty members. ^(Core)

IV.A.4. Delineation of resident responsibilities for patient care, progressive responsibility for patient management, and graded supervision; ^(Core)

IV.A.4.a) These responsibilities are described for each PGY level and specified in Milestones progress as determined by the Clinical Competency Committee (CCC).

IV.A.5. A broad range of structured didactic activities; ^(Core)

IV.A.4.a) Residents must be provided with protected time to participate in structured core didactic activities. ^(Core)

Didactic activities include, but are not limited to, lectures, conferences, courses, labs, asynchronous learning, case discussions, grand rounds, didactic teaching, journal clubs, and education in critical appraisal of medical evidence.

IV.A.6. Advancement of residents' knowledge of ethical principles essential to medical professionalism; ^(Core)

IV.A.7. Advancement in the residents' knowledge of the basic principles of scientific inquiry, including how to design, conduct, and evaluate clinical research, explanation of it to patients, and applied to patient care. ^(Core)

IV.B. Defined Core Competencies

IV.B.1. The program must integrate the following Core Competencies into the curriculum: ^(Core)

IV.B.1.a) Professionalism

Residents must demonstrate a commitment to professionalism and an adherence to ethical principles. ^(Core)

IV.B.1.a)(1) Residents must demonstrate competence in:

IV.B.1.a)(1)(a) compassion, integrity, and respect for others; ^(Core)

IV.B.1.a)(1)(b) responsiveness to patient needs that supersedes self-interest; ^(Core)

IV.B.1.a)(1)(c) respect for patient privacy and autonomy; ^(Core)

IV.B.1.a)(1)(d) accountability to patients, society, and the profession; ^(Core)

IV.B.1.a)(1)(e) respect and responsiveness to diverse patient populations, including but not limited to diversity in gender, age, culture, race, religion, disabilities, national origin, socioeconomic status, and sexual orientation; ^(Core)

IV.B.1.a)(1)(f) ability to recognize and develop a plan for one's own professional wellbeing; ^(Core)

IV.B.1.a)(1)(g) appropriately disclosing and addressing conflict or duality of interest ^(Core)

IV.B.1.b) Patient Care and Procedural Skills

IV.B.1.b)(1) Residents must be able to provide patient care that is appropriate, and effective for the treatment or health problems and the promotion of health. ^(Core)

IV.B.1.b)(1)(a) Anatomic and Clinical Pathology

Residents must demonstrate competence in:

IV.B.1.b)(1)(a)(i) addressing laboratory quality, safety, and management issues, with appropriate support; ^(Core)

IV.B.1.b)(1)(a)(ii) interpreting laboratory data as part of patient-care decision-making; ^(Core)

IV.B.1.b)(1)(a)(iii) interpreting laboratory tests, including:

IV.B.1.b)(1)(a)(iii)(a) hematopathology (e.g. body fluids, bone marrow aspirates and biopsies, lymph node biopsies, and peripheral smears); (Core)

IV.B.1.b)(1)(a)(iii)(b) molecular pathology, cytogenetics, germline and cancer genomics. (Core)

IV.B.1.b)(1)(a)(iv) providing appropriate and effective pathology services consultation; (Core)

IV.B.1.b)(1)(a)(v) providing medical advice on the diagnosis and management of diseases, and laboratory test selection and interpretation. (Core)

IV.B.1.b)(1)(b) Anatomic Pathology

Residents must demonstrate competence in:

IV.B.1.b)(1)(b)(i) examining and diagnosing gynecologic, non-gynecologic, and fine needle aspiration cytology specimens; (Core)

IV.B.1.b)(1)(b)(ii) examining and diagnosing surgical pathology specimens; (Core)

IV.B.1.b)(1)(b)(iii) providing cytologic-histologic correlation. (Core)

IV.B.1.b)(1)(c) Clinical Pathology

Residents must demonstrate competence in:

IV.B.1.b)(1)(c)(i) interpreting laboratory tests, including:

IV.B.1.b)(1)(c)(i)(a) chemistry; (Core)

IV.B.1.b)(1)(c)(i)(b) hematology and coagulation; (Core)

IV.B.1.b)(1)(c)(i)(c) microbiology and serology; (Core)

IV.B.1.b)(1)(c)(i)(d) molecular pathology, cytogenetics, germline and cancer genomics, and medical informatics; (Core)

IV.B.1.b)(1)(c)(i)(e) point of care test;
(Core)

IV.B.1.b)(1)(c)(ii) transfusion medicine. (Core)

IV.B.1.b)(2) Residents must be able to perform all medical, diagnostic, and surgical procedures considered essential for the area of practice. (Core)

IV.B.1.b)(2)(a) Anatomic Pathology

Residents must demonstrate competence in:

IV.B.1.b)(2)(a)(i) all aspects of an autopsy, as appropriate to the case; (Core)

IV.B.1.b)(2)(a)(ii) assessing the adequacy and appropriate triage of fine needle aspiration specimens; (Core)

IV.B.1.b)(2)(a)(iii) gross examination of surgical pathology specimens; (Core)

IV.B.1.b)(2)(a)(iv) performing and diagnosing intraoperative consultations including frozen sections; (Core)

IV.B.1.b)(2)(a)(v) performing microscopic examination of surgical pathology specimen.
(Core)

IV.B.1.c) Medical Knowledge

Residents must demonstrate knowledge of established and evolving biomedical, clinical, epidemiological and social behavioral sciences, as well as the application of this knowledge to patient care. (Core)

IV.B.1.c)(1) Anatomic and Clinical Pathology

Residents must demonstrate knowledge of:

IV.B.1.c)(1)(a) pathogenesis, diagnostic techniques, and prognostic factors for disease processes commonly analyzed and diagnosed by laboratory and pathologic methods, as matches the program's specialty concentration; (Core)

IV.B.1.c)(1)(b) statistical concepts used in the evaluation of testing procedures and test results, including sensitivity, specificity, predictive value,

correlation studies, and reference range determination; (Core)

IV.B.1.c)(1)(c) the principles of laboratory management, inspection, and accreditation; (Core)

IV.B.1.c)(1)(d) principles of laboratory informatics. (Core)

IV.B.1.c)(2) Anatomic Pathology

Residents must demonstrate knowledge of:

IV.B.1.c)(2)(a) fine needle aspirations, including indications, complications, safety considerations, and specimen preparation; (Core)

IV.B.1.c)(2)(b) grossing, performing microscopic examination of specimens, Typing and grading of neoplastic processes and writing a comprehensive surgical pathology report. (Core)

IV.B.1.c)(3) Clinical Pathology

Residents must demonstrate knowledge of:

IV.B.1.c)(3)(a) apheresis, including indications, complications, safety considerations, and specimen preparation; (Core)

IV.B.1.c)(3)(b) bone marrow procedures, including indications, complications, safety considerations, and specimen preparation; (Core)

IV.B.1.c)(3)(c) histocompatibility. (Core)

IV.B.1.d) Practice-based Learning and Improvement

Residents must demonstrate the ability to investigate and evaluate their care of patients, applying scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning. (Core)

IV.B.1.d)(1) Residents must demonstrate competence in:

IV.B.1.d)(1)(a) identifying strengths, deficiencies, and limits in one's knowledge and expertise; (Core)

IV.B.1.d)(1)(b) setting learning and improvement goals; (Core)

IV.B.1.d)(1)(c) identifying and performing appropriate learning activities; ^(Core)

IV.B.1.d)(1)(d) systematically analyzing practice using quality improvement methods and implementing changes with the goal of practice improvement; ^(Core)

IV.B.1.d)(1)(e) incorporating feedback and formative evaluation into daily practice; ^(Core)

IV.B.1.d)(1)(f) using information technology to optimize learning; ^(Core)

IV.B.1.d)(1)(g) performing a quality improvement project; ^(Core)

IV.B.1.d)(1)(h) evaluating personal practice using an individualized learning plan and portfolio. ^(Core)

IV.B.1.e) Interpersonal and Communication Skills

Residents must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, their families, and health professionals. ^(Core)

IV.B.1.e)(1) Residents must demonstrate competence in:

IV.B.1.e)(1)(a) communicating effectively with patients, families, and the public, as appropriate, across a broad range of socioeconomic and cultural backgrounds; ^(Core)

IV.B.1.e)(1)(b) communicating effectively with physicians, other health professionals and health-related agencies; ^(Core)

IV.B.1.e)(1)(c) working effectively as a member or leader of a health care team or other professional group; ^(Core)

IV.B.1.e)(1)(d) educating patients, families, students, residents, and other health professionals; ^(Core)

IV.B.1.e)(1)(e) acting in a consultative role to other physicians and health professionals; ^(Core)

IV.B.1.e)(1)(f) maintaining comprehensive, timely, and legible medical records, if applicable; ^(Core)

IV.B.1.e)(2) Residents must learn to communicate with patients and families to partner with them to assess their care goals, including, when appropriate, end-of-life goals. (Core)

IV.B.1.e)(2)(a) communicating effectively both verbally and in writing; (Core)

IV.B.1.e)(2)(b) generating comprehensive pathology and consultation reports. (Core)

IV.B.1.f) Systems-based Practice

Residents must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinants of health, as well as the ability to call effectively on other resources to provide optimal health care. (Core)

IV.B.1.f)(1) Residents must demonstrate competence in:

IV.B.1.f)(1)(a) working effectively in various health care delivery settings and systems relevant to their clinical specialty; (Core)

IV.B.1.f)(1)(b) coordinating patient care across the health care continuum and beyond as relevant to their clinical specialty; (Core)

IV.B.1.f)(1)(c) advocating for quality patient care and optimal patient care systems; (Core)

IV.B.1.f)(1)(d) working in interprofessional teams to enhance patient safety and improve patient care quality; (Core)

IV.B.1.f)(1)(e) participating in identifying system errors and implementing potential systems solutions; (Core)

IV.B.1.f)(1)(f) incorporating considerations of value, cost awareness, delivery and payment, and risk benefit analysis in patient and/or population-based care as appropriate; (Core)

IV.B.1.f)(1)(g) understanding health care finances and its impact on individual patients' health decisions. (Core)

IV.B.1.f)(2) Residents must learn to advocate for patients within the health care system to achieve the patient's and

family's care goals, including, when appropriate, end-of-life goals. (Core)

IV.C. Curriculum Organization and Resident Experiences

IV.C.1. The curriculum must be structured to optimize resident educational experiences, the length of these experiences, and supervisory continuity. (Core)

IV.C.1.a) Assignment of rotations must be structured with sufficient length to provide a quality educational experience, defined by continuity of patient care, ongoing supervision, relationships with faculty members, and high-quality assessment and feedback. (Core)

IV.C.1.b) There should be one faculty member who is responsible for the educational experience on each rotation, to ensure supervisory continuity. (Core)

IV.C.2. The program must provide instruction and experience in pain management if applicable in Anatomic Pathology and Clinical Pathology, including recognition of substance use disorder. (Core)

IV.C.3. Resident experiences must be designed to allow appropriate faculty member supervision such that residents progress to the performance of assigned clinical responsibilities under oversight, as defined in VI.A.2.c)(3), to demonstrate their ability to enter the autonomous practice of anatomic and/or clinical pathology prior to completion of the program. (Core)

IV.C.4. The program must provide instruction and experience in statistical concepts used in the evaluation of testing procedures and test results, including sensitivity, specificity, predictive value, correlation studies, and reference range determination. (Core)

IV.C.5. The curriculum must include a minimum of 24 months of core anatomic pathology and 24 months of core clinical pathology education. (Core)

IV.C.5.a) The remaining 12 months should be a continuation of structured anatomic pathology and/or clinical pathology education or should be devoted to a specialized facet of pathology, which may include up to six months of research, as determined by the program director in conjunction with the Clinical Competency Committee and the residents. (Detail)

IV.C.6. Residents' experience must be augmented by course materials and study sets, such as glass slides or virtual sets, including unusual

cases, as well as by didactic/interactive sessions, such as seminars, departmental conferences, multidisciplinary conferences, lectures, and journal clubs. ^(Core)

IV.C.6.a) There must be regularly scheduled seminars and conferences devoted to the basic and applied medical sciences, as well as clinical correlation conferences. ^(Core)

IV.C.6.b) There must be departmental conferences, in which both faculty members and residents participate, for detailed discussion of difficult and unusual cases. ^(Core)

IV.C.6.b)(1) The program director and faculty members should monitor and evaluate the residents' effectiveness as teachers. ^(Detail)

IV.C.6.b)(2) There should be clinical correlation conferences (e.g., a pediatric mortality conference) held with clinical services such as diagnostic radiology, internal medicine, obstetrics and gynecology, pediatrics, and surgery, and their subspecialties. ^(Detail)

IV.C.7. All education must occur under the direction of the program director or a designated member of the faculty. ^(Core)

IV.C.8. Residents must participate in the regular, formal, clinical and teaching rounds corresponding to the laboratory services to which they are assigned. ^(Core)

IV.C.8.a) These educational experiences may be provided in separate, exclusive rotations, in rotations that combine more than one area, or by other means, but all rotations and other assignments must conform to the educational goals and objectives of the program. ^(Detail)

IV.C.8.b) Residents must participate in pathology conferences, rounds, teaching, and scholarly activity. ^(Core)

IV.C.9. Anatomic and Clinical Pathology

IV.C.9.a) Resident experiences must include education in:

IV.C.9.a.(1) clinical informatics; ^(Core)

IV.C.9.a.(2) cytogenetics; ^(Core)

IV.C.9.a.(3) flow cytometry; ^(Core)

IV.C.9.a.(4) laboratory accreditation and inspection; ^(Core)

IV.C.9.a)(5) laboratory budgeting, including expense and revenue calculations and projections; ^(Core)

IV.C.9.a)(6) laboratory management, including coding and billing compliance; ^(Core)

IV.C.9.a)(7) molecular pathology; ^(Core)

IV.C.9.a)(8) patient, provider, and laboratory safety; ^(Core)

IV.C.9.a)(9) principles of human resource management; ^(Core)

IV.C.9.a)(10) proficiency testing; ^(Core)

IV.C.9.a)(11) public health reporting; ^(Core)

IV.C.9.a)(12) test method validation and verification; ^(Core)

IV.C.9.a)(13) the use of hospital and laboratory information systems; ^(Core)

IV.C.9.a)(14) quality assurance; ^(Core)

IV.C.9.a)(15) quality improvement; ^(Core)

IV.C.9.a)(16) laboratory regulations and regulatory compliance; ^(Core)

IV.C.9.a)(17) risk management; ^(Core)

IV.C.9.a)(18) other advanced diagnostic techniques as they become available. ^(Core)

IV.C.9.b) Residents must participate in:

IV.C.9.b)(1) a quality improvement project; ^(Core)

IV.C.9.b)(2) laboratory accreditation inspections or mock inspections; ^(Core)

IV.C.9.b)(3) laboratory proficiency testing process, including review of results; ^(Core)

IV.C.9.b)(4) test method validation and verification; ^(Core)

IV.C.9.b)(5) writing standard operating procedures; ^(Core)

IV.C.9.b)(6) the application of clinical informatics, including hospital, laboratory, and pathology information systems; ^(Core)

IV.C.9.b)(7) quality assurance activities. ^(Core)

IV.C.10. Anatomic Pathology

IV.C.10.a) Resident experiences in anatomic pathology must include education in:

IV.C.10.a)(1) autopsy and surgical pathology; ^(Core)

IV.C.10.a)(2) cytopathology (including cyto-preparatory techniques); ^(Core)

IV.C.10.a)(3) dermatopathology; ^(Core)

IV.C.10.a)(4) fine needle aspiration techniques; ^(Core)

IV.C.10.a)(5) forensic pathology; ^(Core)

IV.C.10.a)(6) histochemistry; ^(Core)

IV.C.10.a)(7) immunopathology; ^(Core)

IV.C.10.a)(8) neuropathology; ^(Core)

IV.C.10.a)(9) pediatric pathology; ^(Core)

IV.C.10.a)(10) renal pathology; ^(Core)

IV.C.10.a)(11) ultrastructural pathology. ^(Core)

IV.C.10.b) Each resident must participate in at least 30 autopsies. Autopsies may be shared, but no more than two residents may count a shared case toward this requirement. ^(Core)

IV.C.10.b)(1) The number of limited autopsies (e.g., chest or abdomen only), including single-organ autopsies (e.g., brain only, heart only) used to meet this requirement must not exceed five and must not be shared. ^(Core)

IV.C.10.b)(2) To be counted as one of the required 30 cases, an autopsy must include, as appropriate to the case: ^(Core)

IV.C.10.b)(2)(a) review of the clinical history and circumstances of death; ^(Core)

IV.C.10.b)(2)(b) external examination of the body; ^(Core)

IV.C.10.b)(2)(c) gross dissection, including organ evisceration; ^(Core)

IV.C.10.b)(2)(d) review of microscopic and laboratory findings; ^(Core)

IV.C.10.b)(2)(e) preparation of written description of gross and microscopic findings; (Core)

IV.C.10.b)(2)(f) development of opinion as to the cause of death; (Core)

IV.C.10.b)(2)(g) clinical pathologic correlation; (Core)

IV.C.10.b)(2)(h) review of the autopsy report with a faculty member. (Core)

IV.C.10.c) Residents must have exposure to forensic, pediatric, perinatal, and stillborn autopsies. (Core)

IV.C.10.d) Residents must document all autopsies performed in the NIHS Case Log System. (Core)

IV.C.10.e) Each resident must examine and assess at least 3000 surgical pathology cases. (Core)

IV.C.10.e)(1) This material must be from an adequate mix of cases to ensure exposure to both common and uncommon conditions. (Core)

IV.C.10.e)(2) Residents must preview their cases prior to sign-out with an attending pathologist. (Core)

IV.C.10.e)(3) Residents must formulate a microscopic diagnosis for the majority of cases they examine grossly. (Core)

IV.C.10.f) Each resident must perform at least 200 intra-operative consultations. (Core)

IV.C.10.g) Each resident must examine at least 1,500 cytologic specimens, including a variety of both exfoliative and aspiration specimens. (Core)

IV.C.11. Clinical Pathology

IV.C.11.a) Resident experiences in clinical pathology must include education in:

IV.C.11.a)(1) bone marrow aspiration techniques; (Core)

IV.C.11.a)(2) blood banking/transfusion medicine; (Core)

IV.C.11.a)(3) chemical pathology; (Core)

IV.C.11.a)(4) coagulation; (Core)

IV.C.11.a)(5) hematology; (Core)

IV.C.11.a)(6) medical microscopy (including urinalysis); (Core)

IV.C.11.a)(7) microbiology (including bacteriology, mycology, parasitology, and virology); (Core)

IV.C.11.a)(8) flowcytometry; (core)

IV.C.11.a)(9) molecular genetics. (core)

IV.D. Scholarship

Medicine is both an art and a science. The physician is a humanistic scientist who cares for patients. This requires the ability to think critically, evaluate the literature, appropriately assimilate new knowledge, and practice lifelong learning. The program and faculty must create an environment that fosters the acquisition of such skills through resident participation in scholarly activities. Scholarly activities must include discovery, integration, application, and teaching.

IV.D.1. Program Responsibilities

IV.D.1.a) The program must demonstrate evidence of scholarly activities consistent with its mission(s) and aims. (Core)

IV.D.1.b) The program, in partnership with its Sponsoring Institution, must allocate adequate resources to facilitate resident and faculty involvement in scholarly activities. (Core)

IV.D.1.c) The program must advance residents' knowledge and practice of the scholarly approach to evidence-based patient care. (Core)

Background and Intent: *Elements of a scholarly approach to patient care include:*

- *Asking meaningful questions to stimulate residents to utilize learning resources to create a differential diagnosis, a diagnostic algorithm, and treatment plan.*
- *Challenging the evidence that the residents use to reach their medical decisions so that they understand the benefits and limits of the medical literature.*
- *When appropriate, dissemination of scholarly learning in a peer-reviewed manner (publication or presentation).*
- *Improving resident learning by encouraging them to teach using a scholarly approach.*

IV.D.2. Faculty Scholarly Activity

IV.D.2.a) Among their scholarly activity, programs must demonstrate accomplishments in at least three of the following domains: (Core)

- Research in basic science, education, translational science, patient care, or population health
- Peer-reviewed journal publications, case-presentation publications
- Quality improvement and/or patient safety initiatives
- Systematic reviews, meta-analyses, review articles, chapters in medical textbooks, or case reports
- Creation of curricula, evaluation tools, didactic educational activities, or electronic educational materials
- Contribution to professional committees, educational organizations, or editorial boards
- Innovations in education

IV.D.2.b) The program must demonstrate scholarly activity by the following methods:

IV.D.2.b)(1) faculty participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor; ^(Core)

IV.D.2.b)(2) peer-reviewed publication incl. case-discussion and letters to the editor. ^(Core)

IV.D.3. Resident Scholarly Activity

IV.D.3.a) While in the program, residents must engage in at least one of the following scholarly activities: participation in grand rounds, posters, workshops, quality improvement presentations, podium presentations, grant leadership, non-peer-reviewed print/electronic resources, articles or publications, book chapters, textbooks, webinars, service on professional committees, or serving as a journal reviewer, journal editorial board member, or editor. ^(Core)

IV.D.3.b) Residents must participate in scholarly projects. ^(Core)

IV.D.3.b)(1) Residents must complete a scholarly project relevant to the specialty which was conducted under supervision of a faculty member. ^(Core)

IV.D.3.b)(2) The project shall be prepared in a form which can be used for publication or presentation and submitted for publication in a specialty specific journal or presented in a national or international specialty conference. ^(Core)

IV.D.3.b)(3) The proof of project submission for publication, or presentation in a medical conference, will be part of the resident's portfolio and will be documented in the final summative evaluation prior to Board Certification, in accordance with NIHS guidelines. ^(Core)

V. Evaluation

V.A. Resident Evaluation

V.A.1. Feedback and Evaluation

Formative and summative evaluation have distinct definitions.

Formative evaluation is monitoring resident learning and providing ongoing feedback that can be used by residents to improve their learning.

More specifically, formative evaluations help:

- residents identify their strengths and weaknesses and target areas that need work;
- program directors and faculty members recognize where residents are struggling and address problems immediately.

Summative evaluation is evaluating a resident's learning by comparing the residents against the goals and objectives of the rotation and program, respectively and is utilized to make decisions about promotion to the next level of training, or program completion.

End-of-rotation and end-of-year evaluations have both summative and formative components. Information from a summative evaluation can be used formatively when residents or faculty members use it to guide their efforts and activities in subsequent rotations and to successfully complete the residency program.

V.A.1.a) Faculty members must directly observe, evaluate, and frequently provide feedback on resident performance during each rotation or similar educational assignment. ^(Core)

This feedback will allow for the development of the learner as they strive to achieve the Milestones. More frequent feedback is strongly encouraged for residents who have deficiencies that may result in a poor final rotation evaluation.

V.A.1.b) Evaluation must be documented at the completion of the assignment. ^(Core)

V.A.1.b)(1) For block rotations of greater than three months in duration, evaluation must be documented at least every three months. ^(Core)

V.A.1.b)(2) For block rotations of any duration, a written evaluation must be provided at the end of the rotation. ^(Core)

V.A.1.b)(3) Longitudinal experiences, such as continuity clinic in the context of other clinical responsibilities, must be evaluated at least every three months and at completion. ^(Core)

V.A.1.c) The program must provide an objective performance evaluation based on the Competencies and the Anatomic Pathology and Clinical Pathology-specific Milestones, and must: ^(Core)

V.A.1.c)(1) use multiple evaluators (e.g., faculty members, peers, patients, self, and other professional staff members) ^(Core)

V.A.1.c)(2) provide that information to the Clinical Competency Committee for its synthesis of progressive resident performance and improvement toward unsupervised practice. ^(Core)

V.A.1.d) The program director or their designee, with input from the Clinical Competency Committee, must:

V.A.1.d)(1) Meet with and review with each resident their documented semi-annual evaluation of performance, including progress and the specialty-specific Milestones ^(Core)

V.A.1.d)(1)(a) Review of resident Case-Logs must be a part of the semi-annual review. ^(Detail)

V.A.1.d)(2) assist residents in developing individualized learning plans to capitalize on their strengths and identify areas for growth; ^(Core)

V.A.1.d)(3) develop plans for residents failing to progress, following both the NIHS Emirati Board and institutional policies and procedures. ^(Core)

Residents who are experiencing difficulties with achieving progress in the Milestones may require intervention to address specific deficiencies. Such intervention,

documented in an individual remediation plan developed by the program director or a faculty mentor and the resident, will take a variety of forms based on the specific learning needs of the resident. However, the NIHS recognizes that there are situations which require more significant intervention that may alter the time course of resident progression. To ensure due process, it is essential that the program director follow NIHS and institutional policies and procedures.

V.A.1.e) At least annually, there must be a summative evaluation of each resident that includes their readiness to progress to the next year of the program, if applicable. ^(Core)

V.A.1.f) The evaluations of a resident's performance must be accessible for review by the resident. ^(Core)

V.A.1.g) Resident assessment must include a resident learning portfolio. ^(Core)

V.A.1.g)(1) This portfolio should include, at a minimum, documentation of:

V.A.1.g)(1)(a) case procedure log(s) including autopsies if applicable to the program's specialty concentration; ^(Detail)

V.A.1.g)(1)(b) regional, national, or international conferences, courses, and meetings attended; ^(Detail)

V.A.1.g)(1)(c) presentations at intra- or extra-mural conferences; ^(Detail)

V.A.1.g)(1)(d) performance on yearly resident in-service examinations; ^(Detail)

V.A.1.g)(1)(e) annual resident self-assessment and learning plan; ^(Detail)

V.A.1.g)(1)(f) quality improvement projects; ^(Detail)

V.A.1.g)(1)(g) scholarly activity; ^(Detail)

V.A.1.g)(1)(h) other materials pertinent to the educational experience of the residents, as determined by the program director. ^(Detail)

V.A.1.g) Assessment should specifically monitor the resident's knowledge by use of a formal In-Training Examination or other cognitive exams. Tests results should not be the sole criterion of

resident knowledge and should not be used as the sole criterion for promotion to a subsequent PG level. ^(Detail)

V.A.1.h) Resident Promotion:

- Residents are eligible to sit for Part 1 of the Emirati Board Exam after completing PGY2 and should complete it by the end of PGY3 as a prerequisite to being promoted to PGY4. ^(Core)
- Residents who fail the Part 1 exam after PGY3 are required to repeat the year. Refer to NIHS eligibility criteria included in the Training Bylaw. ^(Core)

V.A.2. Final Evaluation

V.A.2.a) The program director must provide a final evaluation for each resident upon completion of the program. ^(Core)

V.A.2.a)(1) The Anatomic Pathology and Clinical Pathology-specific Milestones, and when applicable the specialty-specific Case Logs, must be used as tools to ensure residents are able to engage in autonomous practice upon completion of the program. ^(Core)

V.A.2.a)(2) The final evaluation must:

V.A.2.a)(2)(a) become part of the resident's permanent record maintained by the institution, and must be accessible for review by the resident in accordance with institutional policy; ^(Core)

V.A.2.a)(2)(b) verify that the resident has demonstrated the knowledge, skills, and behaviours necessary to enter autonomous practice; ^(Core)

V.A.2.a)(2)(c) consider recommendations from the Clinical Competency Committee; ^(Core)

V.A.2.a)(2)(d) be shared with the resident upon completion of the program. ^(Core)

V.A.3. A Clinical Competency Committee must be appointed by the program director. ^(Core)

V.A.3.a) The Clinical Competency Committee must include at least three members of the program faculty, at least one of whom is a core faculty member. ^(Core)

V.A.3.a)(1) Additional members must be faculty members from the same program or other programs, or other health

professionals who have extensive contact and experience with the program's residents. ^(Core)

V.A.3.a)(2) The Program Director has final responsibility for resident evaluation and promotion decisions. ^(Core)

V.A.3.b) The Clinical Competency Committee must:

V.A.3.b)(1) review all residents evaluation at least semi-annually; ^(Core)

V.A.3.b)(2) determine each resident's progress on achievement of the specialty-specific Milestones; ^(Core)

V.A.3.b)(3) meet prior to the residents' semi-annual evaluations and advise the program director regarding each resident's progress. ^(Core)

V.B. Faculty Evaluation

V.B.1. The program must have a process to evaluate each faculty member's performance as it relates to the educational program at least annually. ^(Core)

V.B.1.a) This evaluation must include a review of the faculty member's clinical teaching abilities, engagement with the educational program, participation in faculty development related to their skills as an educator, clinical performance, review of patient outcomes, professionalism, research, and scholarly activities. ^(Core)

V.B.1.b) This evaluation must include written, anonymous, and confidential evaluations by the residents. ^(Core)

V.B.2. Faculty members must receive feedback on their evaluations at least annually. ^(Core)

V.B.3. Results of the faculty educational evaluations should be incorporated into program-wide faculty development plans. ^(Core)

The program has the responsibility to evaluate and improve the program faculty members' teaching, scholarship, professionalism, and quality care. Therefore, the annual review of the program's faculty members is mandatory and can be used as input into the Annual Program Evaluation

V.C. Program Evaluation and Improvement

V.C.1. The program director must appoint the Program Evaluation Committee to conduct and document the Annual Program Evaluation as part of the program's continuous improvement process. ^(Core)

The performance of residents and faculty members reflects program quality and will use metrics to reflect the program's goals.

The Program Evaluation Committee must present the Annual Program Evaluation Report in a written form to be discussed with all program faculty and residents as a part of continuous improvement plans.

V.C.1.a) The Program Evaluation Committee must be composed of at least two program faculty members, at least one of whom is a core faculty member, and at least one resident. ^(Core)

V.C.1.b) Program Evaluation Committee responsibilities must include:

V.C.1.b)(1) acting as an advisor to the program director, through program oversight; ^(Core)

V.C.1.b)(2) review of the program's requirements, both NIHS Emirati Board required and program self-determined goals, and the progress toward meeting them; ^(Core)

V.C.1.b)(3) guiding ongoing program improvement, including developing new goals based upon outcomes; ^(Core)

V.C.1.b)(4) review of the current operating environment to identify strengths, challenges, opportunities, and threats related to the program's mission and aims. ^(Core)

V.C.1.c) The Program Evaluation Committee should consider the following elements in its assessment of the program:

V.C.1.c)(1) program curriculum; ^(Core)

V.C.1.c)(2) outcomes from prior Annual Program Evaluation(s); ^(Core)

V.C.1.c)(3) NIHS letters of notification including citations, areas for improvement, and comments; ^(Core)

V.C.1.c)(4) the quality and safety of patient care; ^(Core)

V.C.1.c)(5) Aggregate residents and the faculty:

V.C.1.c)(5)(a) well-being; ^(Core)

V.C.1.c)(5)(b) recruitment and retention following institutional policies; ^(Core)

V.C.1.c)(5)(c) workforce diversity following institutional policies; ^(Core)

V.C.1.c)(5)(d) engagement in quality improvement and patient safety; ^(Core)

V.C.1.c)(5)(e) scholarly activity; ^(Core)

V.C.1.c)(5)(f) Resident and Faculty Surveys; ^(Core)

V.C.1.c)(5)(g) written evaluations of the program (see above). ^(Core)

V.C.1.c)(6) Aggregate resident:

V.C.1.c)(6)(a) achievement of the Milestones; ^(Core)

V.C.1.c)(6)(b) in-training examination results ; ^(Core)

V.C.1.c)(6)(c) board pass and certification rates; ^(Core)

V.C.1.c)(6)(d) graduates' performance. ^(Core)

V.C.1.c)(7) Aggregate faculty:

V.C.1.c)(7)(a) faculty evaluation; ^(Core)

V.C.1.c)(7)(b) professional development. ^(Core)

V.C.1.d) The Program Evaluation Committee must evaluate the program's mission and aims, strengths, areas for improvement, and threats. ^(Core)

V.C.1.e) The Annual Program Evaluation review, including the action plan, must:

V.C.1.e)(1) be distributed to and discussed with the members of the teaching faculty and the residents; ^(Core)

V.C.1.e)(2) be submitted to the DIO. ^(Core)

V.C.2. The program will be accredited and reaccredited by the NIHS in accordance with NIHS Accreditation Bylaws. ^(Core)

V.C.2.a) The program must complete a Self-Study before its reaccreditation Site Visit. ^(Core)

V.C.2.b) The Self-Study is an objective, comprehensive evaluation of the residency program with the aim to improve it. ^(Core)

V.C.3. The goal of NIHS-accredited education is to train physicians who seek and achieve a board certification. One measure of the effectiveness of the educational program is the ultimate pass rate. ^(Core)

V.C.4. Under the guidance of the Program Director all eligible program graduates should take the certifying examination conducted by the NIHS Emirati Board to obtain the Board Certification. ^(Core)

V.C.5. During the residency, the Residents are strongly encouraged to sit for an organized Annual In-Training Examination. ^(Core)

VI. The Learning and Working Environment

Residency education must occur in the context of a learning and working environment that emphasizes the following principles:

- Excellence in the safety and quality of care rendered to patients by residents today.
- Excellence in the safety and quality of care rendered to patients by today's residents in their future practice.
- Excellence in professionalism through faculty modeling of:
 - the effacement of self-interest in a humanistic environment that supports the professional development of physicians;
 - the joy of curiosity, problem-solving, intellectual rigor, and discovery.
- Commitment to the well-being of the students, residents, faculty members, and all members of the health care team.

VI.A. Patient Safety, Quality Improvement, Supervision and Accountability

VI.A.1. Patient Safety and Quality Improvement

All physicians share responsibility for promoting patient safety and enhancing the quality of patient care. Graduate medical education must prepare residents to provide the highest level of clinical care with continuous focus on the safety, individual needs, and humanity of their patients. It is the right of each patient to be cared for by residents who are appropriately supervised; possess the requisite knowledge, skills, and abilities; understand the limits of their knowledge and experience; and seek assistance as required to provide optimal patient care.

Residents must demonstrate the ability to analyze the care they provide, understand their roles within health care teams, and play an active role in system improvement processes. Graduating residents will apply these skills to critique their future unsupervised practice and effect quality improvement measures.

It is necessary for residents and faculty members to consistently work in a well-coordinated manner with other health care professionals to achieve organizational patient safety goals.

VI.A.1.a) Patient Safety

VI.A.1.a)(1) Culture of Safety

A culture of safety requires continuous identification of vulnerabilities and a willingness to transparently deal with them. An effective organization has formal mechanisms to assess the knowledge, skills, and attitudes of its personnel toward safety to identify areas for improvement.

VI.A.1.a)(1)(a) The program, its faculty, residents, and fellows must actively participate in patient safety systems and contribute to a culture of safety.
(Core)

VI.A.1.a)(1)(b) The program must have a structure that promotes safe, inter-professional, team-based care. (Core)

VI.A.1.a)(2) Education on Patient Safety

Programs must provide formal educational activities that promote patient safety-related goals, tools, and techniques. (Core)

Background and Intent: *Optimal patient safety occurs in the setting of a coordinated inter-professional learning and working environment.*

VI.A.1.a)(3) Patient Safety Events

Reporting, investigation, and follow-up of adverse events, near misses, and unsafe conditions are pivotal mechanisms for improving patient safety and are essential for the success of any patient safety program. Feedback and experiential learning are essential to developing true competence in the ability to identify causes and institute sustainable systems-based changes to ameliorate patient safety vulnerabilities.

VI.A.1.a)(3)(a) Residents, fellows, faculty members, and other clinical staff members must:

- know their responsibilities in reporting patient safety events at the clinical site; (Core)

- know how to report patient safety events, including near misses, at the clinical site; ^(Core)
- be provided with summary information of their institution's patient safety reports. ^(Core)

VI.A.1.a)(3)(b) Residents must participate as team members in real and/or simulated inter-professional clinical patient safety activities, such as root cause analyses or other activities that include analysis, as well as formulation and implementation of actions. ^(Core)

VI.A.1.a)(4) Resident Education and Experience in Disclosure of Adverse Events

Patient-centered care requires patients, and when appropriate families, to be apprised of clinical situations that affect them, including adverse events. This is an important skill for faculty physicians to model, and for residents to develop and apply.

VI.A.1.a)(4)(a) All residents must receive training in how to disclose adverse events to patients and families. ^(Core)

VI.A.1.a)(4)(b) Residents should have the opportunity to participate in the disclosure of patient safety events, real or simulated. ^(Detail)

VI.A.1.b) Quality Improvement

VI.A.1.b)(1) Education in Quality Improvement

A cohesive model of health care includes quality-related goals, tools, and techniques that are necessary for health care professionals to achieve quality improvement goals.

Residents must receive training and experience in quality improvement processes, including an understanding of health care disparities. ^(Core)

VI.A.1.b)(2) Quality Metrics

Access to data is essential to prioritizing activities for care improvement and evaluating success of improvement efforts.

Residents and faculty members must receive data on quality metrics and benchmarks related to their patient populations. ^(Core)

VI.A.1.b)(3) Engagement in Quality Improvement Activities

Experiential learning is essential to developing the ability to identify and institute sustainable systems-based changes to improve patient care.

Residents must have the opportunity to participate in inter-professional quality improvement activities. ^(Core)

VI.A.2. Supervision and Accountability

VI.A.2.a) Although the attending physician is ultimately responsible for the care of the patient, every physician shares in the responsibility and accountability for their efforts in the provision of care. Effective programs, in partnership with their Sponsoring Institutions, define, widely communicate, and monitor a structured chain of responsibility and accountability as it relates to the supervision of all patient care.

Supervision in the setting of graduate medical education provides safe and effective care to patients; ensures each resident's development of the skills, knowledge, and attitudes required to enter the unsupervised practice of medicine; and establishes a foundation for continued professional growth.

VI.A.2.a)(1) Each patient must have an identifiable and appropriately-credentialed and privileged attending physician who is responsible and accountable for the patient's care. ^(Core)

VI.A.2.a)(1)(a) This information must be available to residents, faculty members, other members of the health care team, and patients. ^(Core)

VI.A.2.a)(1)(b) Residents and faculty members must inform each patient of their respective roles in that patient's care when providing direct patient care. ^(Core)

VI.A.2.b) Supervision may be exercised through a variety of methods. For many aspects of patient care, the supervising physician may be a more advanced resident or fellow. Other portions of care provided by the resident can be adequately supervised by the appropriate availability of the supervising

faculty member, fellow, or senior resident physician, either on site or by means of telecommunication technology. Some activities require the physical presence of the supervising faculty member. In some circumstances, supervision may include post-hoc review of resident-delivered care with feedback.

VI.A.2.b)(1) The program must demonstrate that the appropriate level of supervision in place for all residents is based on each resident's level of training and ability, as well as patient complexity and acuity. Supervision may be exercised through a variety of methods, as appropriate to the situation. ^(Core)

VI.A.2.b)(2) The program must define when the physical presence of a supervising physician is required. ^(Core)

VI.A.2.c) Levels of Supervision

To promote appropriate resident supervision while providing for graded authority and responsibility, the program must use the following classification of supervision: ^(Core)

VI.A.2.c)(1) Direct Supervision

VI.A.2.c)(1)(a) the supervising physician is physically present with the resident during the key portions of the patient interaction; or, ^(Core)

VI.A.2.c)(1)(b) the supervising physician and/or patient is not physically present with the resident and the supervising physician is concurrently monitoring the patient care through appropriate telecommunication technology. ^(Core)

VI.A.2.c)(1)(c) PGY-1 residents must initially be supervised directly, only as described in VI.A.2.c)(1)(a) ^(Core)

VI.A.2.c)(1)(d) Each PGY-1 resident must be directly supervised during performance of, at least, his or her three initial procedures in the following areas: ^(Core)

VI.A.2.c)(1)(d)(i) apheresis; ^(Detail)

VI.A.2.c)(1)(d)(ii) autopsies (complete or limited); ^(Detail)

VI.A.2.c)(1)(d)(iii) bone marrow biopsies and aspirates; ^(Detail)

VI.A.2.c)(1)(d)(iv) fine needle aspirations and interpretation of the aspirate; ^(Detail)

VI.A.2.c)(1)(d)(v) frozen sections; ^(Detail)

VI.A.2.c)(1)(d)(vi) gross dissection of complex surgical pathology specimens by organ system. ^(Detail)

VI.A.2.c)(1)(e) Only a surgical pathology fellow, a resident who has completed at least 12 months of anatomic pathology education, a pathologist's assistant, or an attending pathologist may directly supervise the gross dissection of surgical pathology specimens and/or autopsies. ^(Detail)

VI.A.2.c)(1)(f) Only a blood banking/transfusion medicine fellow, a clinical hematology-oncology fellow, a resident who has completed at least 12 months of clinical pathology education, including core training in apheresis, or an attending physician credentialed for apheresis may directly supervise apheresis. ^(Detail)

VI.A.2.c)(1)(g) The program must have clear guidelines that delineate which competencies must be demonstrated to determine when a resident can progress to indirect supervision. ^(Core)

VI.A.2.c)(1)(h) The program director must ensure that clear expectations exist and are communicated to the residents, and that these expectations outline specific situations in which a resident would still require direct supervision. ^(Core)

VI.A.2.c)(2) Indirect Supervision: the supervising physician is not providing physical or concurrent visual or audio supervision but is immediately available to the resident for guidance and is available to provide appropriate direct supervision. ^(Core)

VI.A.2.c)(3) Oversight: the supervising physician is available to provide a review of procedures/encounters with feedback provided after care is delivered. ^(Core)

VI.A.2.d) The privilege of progressive authority and responsibility, conditional independence, and a supervisory role in patient care delegated to each resident must be assigned by the program director and faculty members. ^(Core)

VI.A.2.d)(1) The program director must evaluate each resident's abilities based on specific criteria, guided by the Milestones. ^(Core)

VI.A.2.d)(2) Faculty members functioning as supervising physicians must delegate portions of care to residents based on the needs of the patient and the skills of each resident. ^(Core)

VI.A.2.d)(3) Senior residents or fellows should serve in a supervisory role to junior residents in recognition of their progress toward independence, based on the needs of each patient and the skills of the individual resident or fellow. ^(Detail)

VI.A.2.e) Programs must set guidelines for circumstances and events in which residents must communicate with the supervising faculty member(s). ^(Core)

VI.A.2.e)(1) Each resident must know the limits of their scope of authority, and the circumstances under which the resident is permitted to act with conditional independence. ^(Outcome)

VI.A.2.f) Faculty supervision assignments must be of sufficient duration to assess the knowledge and skills of each resident and to delegate to the resident the appropriate level of patient care authority and responsibility. ^(Core)

VI.B. Professionalism

VI.B.1. Programs, in partnership with their Sponsoring Institutions, must educate residents and faculty members concerning the professional responsibilities of physicians, including their obligation to be appropriately rested and fit to provide the care required by their patients. ^(Core)

VI.B.2. The learning objectives of the program must:

VI.B.2.a) be accomplished through an appropriate blend of supervised patient care responsibilities, clinical teaching, and didactic educational events; ^(Core)

VI.B.2.b) be accomplished without excessive reliance on residents to fulfill non-physician obligations; (Core)

VI.B.2.c) ensure manageable patient care responsibilities. (Core)

VI.B.3. The program director, in partnership with the Sponsoring Institution, must provide a culture of professionalism that supports patient safety and personal responsibility. (Core)

VI.B.4. Residents and faculty members must demonstrate an understanding of their personal role in the:

VI.B.4.a) provision of patient- and family-centered care; (Outcome)

VI.B.4.b) safety and welfare of patients entrusted to their care, including the ability to report unsafe conditions and adverse events; (Outcome)

Background and Intent: *This requirement emphasizes that responsibility for reporting unsafe conditions and adverse events is shared by all members of the team and is not solely the responsibility of the residents.*

VI.B.4.c) assurance of their fitness for work, including; (Outcome)

VI.B.4.c)(1) management of their time before, during, and after clinical assignments; (Outcome)

VI.B.4.c)(2) recognition of impairment, including from illness, fatigue, and substance use, in themselves, their peers, and other members of the health care team. (Outcome)

VI.B.4.d) commitment to lifelong learning; (Outcome)

VI.B.4.e) monitoring of their patient care performance improvement indicators; (Outcome)

VI.B.4.f) accurate reporting of clinical and educational work hours, patient outcomes, and clinical experience data. (Outcome)

VI.B.5. All residents and faculty members must demonstrate responsiveness to patient needs that supersedes self-interest. This includes the recognition that under certain circumstances, the best interests of the patient may be served by transitioning that patient's care to another qualified and rested provider. (Outcome)

VI.B.6. Programs, in partnership with their Sponsoring Institutions, must provide a professional, equitable, respectful, and civil environment that is free from discrimination, sexual and other forms of harassment, mistreatment, abuse, or coercion of students, residents, faculty, and staff. (Core)

VI.B.7. Programs, in partnership with their Sponsoring Institutions, should have a process for education of residents and faculty regarding unprofessional behavior and a confidential process for reporting, investigating, and addressing such concerns. ^(Core)

VI.C. Well-Being

Psychological, emotional, and physical well-being are critical in the development of the competent, caring, and resilient physician and require proactive attention to life inside and outside of medicine. Well-being requires that physicians retain the joy in medicine while managing their own real-life stresses. Self-care and responsibility to support other members of the health care team are important components of professionalism; they are also skills that must be modeled, learned, and nurtured in the context of other aspects of residency training.

Residents and faculty members are at risk for burnout and depression. Programs, in partnership with their Sponsoring Institutions, have the same responsibility to address well-being as other aspects of resident competence. Physicians and all members of the health care team share responsibility for the well-being of each other. For example, a culture which encourages covering for colleagues after an illness without the expectation of reciprocity reflects the ideal of professionalism. A positive culture, in a clinical learning environment, models constructive behaviors and prepares residents with the skills and attitudes needed to thrive throughout their careers.

VI.C.1. The responsibility of the program, in partnership with the Sponsoring Institution, to address well-being must include:

VI.C.1.a) efforts to enhance the meaning that each resident finds in the experience of being a physician, including protecting time with patients, minimizing non-physician obligations, providing administrative support, promoting progressive autonomy and flexibility, and enhancing professional relationships; ^(Core)

VI.C.1.b) attention to scheduling, work intensity, and work compression that impacts resident well-being; ^(Core)

VI.C.1.c) evaluating workplace safety data and addressing the safety of residents and faculty members; ^(Core)

VI.C.1.d) policies and programs that encourage optimal resident and faculty member well-being; ^(Core)

VI.C.1.e) attention to resident and faculty member burnout, depression, and substance use disorders. The program, in partnership with its Sponsoring Institution, must educate faculty

members and residents in identification of the symptoms of burnout, depression, and substance use disorders, including means to assist those who experience these conditions. Residents and faculty members must also be educated to recognize those symptoms in themselves and how to seek appropriate care. The program, in partnership with its Sponsoring Institution, must: ^(Core)

VI.C.1.e)(1) encourage residents and faculty members to alert the program director or other designated personnel or programs when they are concerned that another resident, fellow, or faculty member may be displaying signs of burnout, depression, a substance disorder, suicidal ideation, or potential for violence; ^(Core)

VI.C.1.e)(2) provide access to appropriate tools for self-screening; and, ^(Core)

VI.C.1.e)(3) provide access to confidential, affordable mental health assessment, counseling, and treatment, including access to urgent and emergent care 24 hours a day, seven days a week. ^(Core)

VI.C.2. There are circumstances in which residents may be unable to attend work, including but not limited to fatigue, illness, family emergencies, and parental leave. Each program must allow an appropriate length of absence for residents unable to perform their patient care responsibilities. ^(Core)

VI.C.2.a) The program must have policies and procedures in place to ensure coverage of patient care. ^(Core)

VI.C.2.b) These policies must be implemented without fear of negative consequences for the residents who is or was unable to provide the clinical work. ^(Core)

<p>Background and Intent: Residents may need to extend their length of training depending on length of absence and specialty board eligibility requirements. Teammates should assist colleagues in need and equitably reintegrate them upon return.</p>
--

VI.D. Fatigue Mitigation

VI.D.1. Programs must:

VI.D.1.a) educate all faculty members and residents to recognize the signs of fatigue and sleep deprivation; ^(Core)

VI.D.1.b) educate all faculty members and residents in alertness management and fatigue mitigation processes; ^(Core)

VI.D.1.c) encourage residents to use fatigue mitigation processes to manage the potential negative effects of fatigue on patient care and learning. ^(Detail)

VI.D.2. Each program must ensure continuity of patient care, consistent with the program's policies and procedures, if a resident may be unable to perform their patient care responsibilities due to excessive fatigue. ^(Core)

VI.D.3. The program, in partnership with its Sponsoring Institution, must ensure adequate sleep facilities and safe transportation options for residents who may be too fatigued to safely return home. ^(Core)

VI.E. Clinical Responsibilities, Teamwork, and Transitions of Care

VI.E.1. Clinical Responsibilities

The clinical responsibilities for each resident must be based on PGY level, patient safety, resident ability, severity and complexity of patient illness/condition, and available support services. ^(Core)

VI.E.2. Teamwork

Residents must care for patients in an environment that maximizes communication. This must include the opportunity to work as a member of effective interprofessional teams that are appropriate to the delivery of care in the specialty and larger health system. ^(Core)

VI.E.2.a) Administrative staff members, autopsy and pathologist's assistants, technologists, clinical laboratory staff members, and nurses should be included as parts of interdisciplinary teams. ^(Detail)

VI.E.2.b) Residents must demonstrate the ability to work and communicate with health care professionals to provide effective, patient-focused care. ^(Core)

VI.E.3. Transitions of Care

VI.E.3.a) Programs must design clinical assignments to optimize transitions in patient care, including their safety, frequency, and structure. ^(Core)

VI.E.3.b) Programs, in partnership with their Sponsoring Institutions, must ensure and monitor effective, structured hand-over processes to facilitate both continuity of care and patient safety. ^(Core)

VI.E.3.c) Programs must ensure that residents are competent in communicating with team members in the hand-over process.
(Outcome)

VI.E.3.d) Programs and clinical sites must maintain and communicate schedules of attending physicians and residents currently responsible for care. (Core)

VI.E.3.e) Each program must ensure continuity of patient care, consistent with the program's policies and procedures, if a resident may be unable to perform their patient care responsibilities due to excessive fatigue or illness, or family emergency. (Core)

VI.F. Clinical Experience and Education

Programs, in partnership with their Sponsoring Institutions, must design an effective program structure that is configured to provide residents with educational and clinical experience opportunities, as well as reasonable opportunities for rest and personal activities.

VI.F.1. Maximum Hours of Clinical and Educational Work per Week

Clinical and educational work hours must be limited to no more than 80 hours per week, averaged over a four-week period, inclusive of all in-house clinical and educational activities and clinical work done from home. (Core)

VI.F.2. Mandatory Time Free of Clinical Work and Education

VI.F.2.a) The program must design an effective program structure that is configured to provide residents with educational opportunities, as well as reasonable opportunities for rest and personal well-being. (Core)

VI.F.2.b) Residents should have eight hours off between scheduled clinical work and education periods. (Detail)

There may be circumstances when residents choose to stay to care for their patients or return to the hospital with fewer than eight hours free of clinical experience and education. This must occur within the context of the 80-hour and the one-day-off-in-seven requirements. (Detail)

VI.F.2.c) Residents must have at least 14 hours free of clinical work and education after 24 hours of in-house call. (Core)

VI.F.2.d) Residents must be scheduled for a minimum of one day in seven free of clinical work and required education (when

averaged over four weeks). At-home call cannot be assigned on these free days. ^(Core)

VI.F.3. Maximum Clinical Work and Education Period Length

VI.F.3.a) Clinical and educational work periods for residents must not exceed 24 hours of continuous scheduled clinical assignments. ^(Core)

VI.F.3.a)(1) Up to four hours of additional time may be used for activities related to patient safety, such as providing effective transitions of care, and/or resident education. ^(Core)

VI.F.3.a)(1)(a) Additional patient care responsibilities must not be assigned to a resident during this time. ^(Core)

VI.F.4. Clinical and Educational Work Hour Exceptions

VI.F.4.a) In rare circumstances, after handing off all other responsibilities, a resident, on their own initiative, may elect to remain or return to the clinical site in the following circumstances:

VI.F.4.a)(1) to continue to provide care to a single severely ill or unstable patient; ^(Detail)

VI.F.4.a)(2) humanistic attention to the needs of a patient or family; or, ^(Detail)

VI.F.4.a)(3) to attend unique educational events. ^(Detail)

VI.F.4.b) These additional hours of care or education will be counted toward the 80-hour weekly limit. ^(Detail)

VI.F.5. Moonlight

Residents are not permitted to moonlight. ^(Core)

VI.F.6. In-House Night Float

Night float must occur within the context of the 80-hour and one-day-off-in-seven requirements. ^(Core)

VI.F.7. Maximum In-House On-Call Frequency

Residents must be scheduled for in-house call no more frequently than every third night (when averaged over a four-week period). ^(Core)

VI.F.8. At-Home Call

VI.F.8.a) Time spent on patient care activities by residents on at-home call must count toward the 80-hour maximum weekly limit.
(Core)

VI.F.8.b) Residents are permitted to return to the hospital while on at-home call to provide direct care for new or established patients. These hours of inpatient patient care must be included in the 80-hour maximum weekly limit. (Detail)

*Core Requirements: Statements that define structure, resource, or process elements essential to every graduate medical educational program.

†Detail Requirements: Statements that describe a specific structure, resource, or process, for achieving compliance with a Core Requirement. Programs and sponsoring institutions in substantial compliance with the Outcome Requirements may utilize alternative or innovative approaches to meet Core Requirements.

‡Outcome Requirements: Statements that specify expected measurable or observable attributes (knowledge, abilities, skills, or attitudes) of residents or fellows at key stages of their graduate medical education.

Acknowledgement

A special gratitude to the Anatomic Pathology and Clinical Pathology Scientific Committee for their contribution in preparing NIHS Anatomic Pathology and Clinical Pathology Requirements.
